

Expanded Metal – Product Data Sheet

Mesh Ref No: 03-01A

Raised Aluminium Insect Mesh

LW Pitch:	3.00mm	Strand Width:	0.28mm
SW Pitch:	1.81mm	Thickness:	0.30mm
Weight:	0.25 kg / m ²	Open Area:	67%

Material: Aluminium Grade 1050 H14

Coil Size: 610mm LWD x 7.62 metres and 10.00 metres SWD.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
