

## Expanded Metal – Product Data Sheet

Mesh Ref No: 03-26

Raised Mild Steel Mesh

LW Pitch:	3.00mm	Strand Width:	0.60mm
SW Pitch:	1.90mm	Thickness:	0.40mm
Weight:	1.98 kg / m <sup>2</sup>	Open Area:	37%

Material: Mild Steel – Cold Reduced DC01 to BS EN 10130  
Sheet Size: 500mm LWD x 1000mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
