

Expanded Metal – Product Data Sheet

Mesh Ref No: 10-08

Raised Mild Steel Mesh

LW Pitch:	10.00mm	Strand Width:	1.17mm
SW Pitch:	5.64mm	Thickness:	0.9mm
Weight:	2.93 kg / m ²	Open Area:	58%

Material: Mild Steel – Cold Reduced DC01 to BS EN 10130
Sheet Size: 1250mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
