

Expanded Metal – Product Data Sheet

Mesh Ref No: 10-16 GDM

Pre-Galv Grain Drying Mesh

LW Pitch:	10.00mm	Strand Width:	2.45mm
SW Pitch:	6.09mm	Thickness:	1.50mm
Weight:	9.47 kg / m ²	Open Area:	19%
Material:	Pre Galvanised Steel - DX51D +Z		
Sheet Size:	1250mm LWD x 930mm SWD		

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
