

## Expanded Metal – Product Data Sheet

Mesh Ref No: 10-50AL

Raised Aluminium Mesh

LW Pitch: 10.00mm  
SW Pitch: 5.64mm  
Weight: 1.35 kg / m<sup>2</sup>

Strand Width: 1.17mm  
Thickness: 1.20mm  
Open Area: 58%

Material: Aluminium Grade 1050 H14  
Sheet Size: 1250mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
