

## Expanded Metal – Product Data Sheet

Mesh Ref No: 10-64FG

Flattened Pre-Galv Mesh

LW Aperture:	6.00mm	Strand Width:	1.30mm
SW Aperture:	3.45mm	Thickness:	0.70mm
Weight:	2.35 kg / m <sup>2</sup>	Open Area:	57%
Material:	Pre Galvanised Steel - DX51D +Z		
Sheet Size:	1250mm LWD x 2500mm SWD		

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
