

## Expanded Metal – Product Data Sheet

Mesh Ref No: 10-97

Raised Mild Steel Mesh

LW Pitch: 101.60mm  
SW Pitch: 50.80mm  
Weight: 3.11 kg / m<sup>2</sup>

Strand Width: 3.35mm  
Thickness: 3.00mm  
Open Area: 86%

Material: Mild Steel – Hot Rolled to BS EN 10111  
Sheet Size: 2440mm LWD x 1220mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
