

## Expanded Metal – Product Data Sheet

Mesh Ref No: 12-69

Raised Mild Steel Mesh

LW Pitch: 121.92mm  
SW Pitch: 31.28mm  
Weight: 5.27 kg / m<sup>2</sup>

Strand Width: 3.50mm  
Thickness: 3.00mm  
Open Area: 78%

Material: Mild Steel – Hot Rolled to BS EN 10111  
Sheet Size: 2440mm LWD x 1220mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
