

Expanded Metal – Product Data Sheet

Mesh Ref No: 19-94SF 316

Flattened Stainless Steel Mesh

LW Aperture:	15.00mm	Strand Width:	1.80mm
SW Aperture:	5.30mm	Thickness:	0.90mm
Weight:	2.90 kg / m ²	Open Area:	62%

Material:	Stainless Steel – Grade 316 to BS EN 1.4401
Sheet Size:	1250mm LWD x 2500mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
