

## Expanded Metal – Product Data Sheet

Mesh Ref No: 30-769FR

Flattened Stainless Steel Mesh

LW Aperture: 21.00mm

Strand Width: 3.00mm

SW Aperture: 9.00mm

Thickness: 1.50mm

Weight: 5.00 kg / m<sup>2</sup>

Open Area: 60%

Material: Stainless Steel Grade 304 to BS EN 1.4301

Sheet Size: 1250mm LWD x 2500mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
