

Expanded Metal – Product Data Sheet

Mesh Ref No: 30-80AF

Flattened Aluminium Mesh

LW Aperture: 24.10mm

Strand Width: 2.39mm

SW Aperture: 7.11mm

Thickness: 1.14mm

Weight: 1.20 kg / m²

Open Area: 60%

Material: Aluminium Grade 1050 H14

Sheet Size: 1250mm LWD x 2500mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
