

Expanded Metal – Product Data Sheet

Mesh Ref No: 30-94

Raised Mild Steel Mesh

LW Pitch: 30.48mm
SW Pitch: 11.72mm
Weight: 5.06 kg / m²

Strand Width: 2.36mm
Thickness: 1.50mm
Open Area: 59%

Material: Mild Steel – Cold Reduced DC01 to BS EN 10130
Sheet Size: 2440mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
