

Expanded Metal – Product Data Sheet

Mesh Ref No: 30-94G

Raised Pre-Galv Mesh

LW Pitch: 30.48mm
SW Pitch: 11.10mm
Weight: 2.41 kg / m²

Strand Width: 1.83mm
Thickness: 0.90mm
Open Area: 67%

Material: Pre Galvanised Steel - DX51D +Z
Sheet Size: 2500mm LWD x 700mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
