

Expanded Metal – Product Data Sheet

Mesh Ref No: 38-84F

Flattened Mild Steel Mesh

LW Aperture:	32.77mm	Strand Width:	3.18mm
SW Aperture:	10.92mm	Thickness:	1.50mm
Weight:	4.41 kg / m ²	Open Area:	63%

Material: Mild Steel – Cold Reduced DC01 to BS EN 10130
Sheet Size: 2440mm LWD x 1220mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
