

Expanded Metal – Product Data Sheet

Mesh Ref No: 50-76FG

Flattened Pre Galv Mesh

LW Aperture: 43.43mm
SW Aperture: 18.03mm
Weight: 1.85 kg / m²

Strand Width: 2.31mm
Thickness: 1.14mm
Open Area: 80%

Material: Pre Galvanised Steel - DX51D +Z
Sheet Size: 1250mm LWD x 2500mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
