

Expanded Metal – Product Data Sheet

Mesh Ref No: 50-87S

Raised Stainless Steel Mesh

LW Pitch:	50.80mm	Strand Width:	2.65mm
SW Pitch:	23.44mm	Thickness:	1.20mm
Weight:	2.30 kg / m ²	Open Area:	73%

Material:	Stainless Steel - Grade 304 to BS EN 1.4301
Sheet Size:	2500mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
