

Expanded Metal – Product Data Sheet

Mesh Ref No: **HEX 19 Pre-Galv**

Raised Pre-Galv Mesh

LW Pitch:	19.05mm	Strand Width:	1.22mm
SW Pitch:	9.50mm	Thickness:	1.20mm
Weight:	2.421 kg / m²	Open Area:	74%

Material: Pre Galvanised Steel - DX51D +Z
Sheet Size: 1250mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
