

Expanded Metal – Product Data Sheet

Mesh Ref No: **HEX 19-24**

Raised Pre-Galv Mesh

LW Pitch: 19.05mm
SW Pitch: 7.62mm
Weight: 4.55 kg / m²

Strand Width: 3.00mm
Thickness: 0.70mm
Open Area: 21%

Material: Pre Galvanised Steel - DX51D +Z
Sheet Size: 1250mm LWD x 2500mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
