

Expanded Metal – Product Data Sheet

Mesh Ref No: **HEX 25**

Raised Aluminium Mesh

LW Pitch: 25.40mm
SW Pitch: 12.70mm
Weight: 0.71 kg / m²

Strand Width: 1.27mm
Thickness: 1.20mm
Open Area: 80%

Material: Aluminium – Grade 1050 H14
Sheet Size: 1250mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
