

## Expanded Metal – Product Data Sheet

Mesh Ref No: **HEX 25**

**Raised Mild Steel Mesh**

**LW Pitch:** 25.40mm  
**SW Pitch:** 12.70mm  
**Weight:** 1.89 kg / m<sup>2</sup>

**Strand Width:** 1.27mm  
**Thickness:** 1.20mm  
**Open Area:** 80%

**Material:** Mild Steel – Cold Reduced DC01 to BS EN 10130  
**Sheet Size:** 1250mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
