

Expanded Metal – Product Data Sheet

Mesh Ref No: Q16 SS

Flattened Stainless Steel Mesh

LW Aperture: 11.70mm

Strand Width: 1.50mm

SW Aperture: 8.50mm

Thickness: 1.50mm

Weight: 3.38 kg / m²

Open Area: 74%

Material: Stainless Steel Grade 304 to BS EN 1.4301

Sheet Size: 1000mm LWD x 2000mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
