

## Expanded Metal – Product Data Sheet

Mesh Ref No: SSEML

Raised Stainless Steel Mesh

LW Pitch: 30.48mm  
SW Pitch: 14.00mm  
Weight: 0.96 kg / m<sup>2</sup>

Strand Width: 1.20mm  
Thickness: 0.70mm  
Open Area: 83%

Material: Stainless Steel - Grade 304 to BS EN 1.4301 & Grade 430 to BS EN 1.4016  
Sheet Size: 2500mm LWD x 700mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
