

Expanded Metal – Product Data Sheet – Ceiling Tile Mesh

Mesh Ref No: MMRB25

Raised Pre Gav Mesh

LW Pitch:	19.05mm	Strand Width:	2.00mm
SW Pitch:	8.00mm	Thickness:	1.20mm
Weight:	4.71 kg / m ²	Open Area:	50%

Sheet Size: 595mm LWD x 595mm SWD – Plus custom sizes made to order.

Material: Pre Galvanised Steel - DX51D +Z, Aluminium - Grade 1050 H14
Mild Steel - Cold Reduced DC01 to BS EN 10130

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
