<b>Weight:</b>	<b>5.09 kg / m<sup>2</sup></b>	<b>Open Area:</b>	<b>37%</b>

**Sheet Size:** 1250mm LWD x 2500mm SWD

**Material:** Aluminium – Grade 1050 H14.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
