

Expanded Metal – Product Data Sheet – Designer Mesh

Mesh Ref No: HATTON

Raised Pre-Galv Mesh

LW Pitch:	10.00mm	Strand Width:	1.75mm
SW Pitch:	6.50mm	Thickness:	1.50mm
Weight:	6.34 kg / m ²	Open Area:	46%

Sheet Size: 1250mm LWD x 2500mm SWD

Material: Pre Galvanised Steel - DX51D +Z, Aluminium – Grade 1050 H14,
Mild Steel – Cold Reduced DC01 to BS EN 10130.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
