

## Expanded Metal – Product Data Sheet – Designer Mesh

Mesh Ref No: **SABRINA 48**

**Raised Aluminium Mesh**

LW Pitch:	135.00mm	Strand Width:	15.00mm
SW Pitch:	48.00mm	Thickness:	3.00mm
Weight:	5.06 kg / m <sup>2</sup>	Open Area:	37%

Sheet Size: 1250mm LWD x 2500mm SWD

Material: Aluminium – Grade 1050 H14.  
Pre Galvanised Steel - DX51D +Z.  
Mild Steel – Cold Reduced DC01 to BS EN 10130.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
