Flattened Mild Steel Mesh

LW Aperture:	24.38mm	Strand Width:	2.08mm
SW Aperture:	7.62mm	Thickness:	1.14mm
Weight:	3.17 kg / m ²	Open Area:	65%

Material:	Mild Steel – Cold Reduced DC01 to BS EN 10130
Sheet Size:	1250mm LWD x 2500mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
